Date/Place of Birth: 29.07.1992 / Emam-Khomeini-Port, Iran  
Nationalität: Iranian

## ABOUT ME

IT professional with over seven years of experience in IT support, server and network administration, and automation solutions. Extensive knowledge of virtualization (VMware), network management (Cisco, Mikrotik), and developing custom software solutions using PHP, Bash, and PowerShell. Strong expertise in implementing network security measures, server monitoring (PRTG, APIs), and troubleshooting. Experienced in managing Linux and Windows servers and optimizing IT infrastructures for reliable and secure system performance.

## WORK EXPERIENCE

### IT SUPPORT SPECIALIST | MARAL HOST CO. | ISFAHAN, IRAN | 05.2022 – PRESENT | [HTTPS://MARALHOST.COM/](https://maralhost.com/)

- Skilled in configuring and maintaining virtual machines, containers (LXC), and software-defined networking within Proxmox
- Set up and managed pfSense instances on Proxmox, including VLANs, NAT, firewall rules, and VPN services
- Deployed and configured VPN tunnels between two networks using Pritunl, including NAT and secure routing
- Managing and troubleshooting virtual servers using VMware ESXi and web panels
- Diagnosing and resolving network and VPS (Virtual Private Server) issues
- Troubleshooting domain and DNS configurations
- Installing and managing SSL certificates
- Setting up and maintaining hosting panels (cPanel, Plesk) and database servers (SQL Server, MySQL)
- Configuring secure VPN connections (SoftEther, OpenVPN, V2Ray)
- Securing WordPress hosting environments and servers

### FREELANCER | ISFAHAN, IRAN | 09.2021 – 04.2022

#### WEB-BASED MONITORING SOLUTION (PHP):

- Developed a system for monitoring server and website availability
- Created real-time reports and integrated the PRTG monitoring API
- Automated port and domain scans to enhance IT infrastructure

### FREELANCER | ISFAHAN, IRAN | 02.2021 – 08.2021

#### DATA EXTRACTION AND ANALYSIS (PHP, PUPPETEER):

- Developed a tool for analyzing Google and YouTube keywords
- Automated data extraction and storage in a MySQL database
- Utilized Puppeteer for automated web analysis

### FREELANCER | ISFAHAN, IRAN | 03.2020 – 01.2021

#### SOFTWARE INSTALLATION AUTOMATION (WINDOWS SCRIPTING):

- Developed a script for automatic software installation
- Automated tasks such as DNS cache clearing and service restarts
- Optimized installation processes for university systems

### FREELANCER | ISFAHAN, IRAN | 05.2019 – 02.2020

#### AUTOMATED INSTALLATION OF ENTERPRISE SOFTWARE (CHARGOON DIDGAH):

- Developed a one-click installer for enterprise software
- Customized system settings in the Windows registry
- Automated software deployment to improve efficiency

### MILITARY SERVICE | IRAN | 12.2017 – 04.2019

- Completed the Iranian mandatory military service

## CERTIFICATIONS & TRAINING

### LINKEDIN LEARNING | 02.2025 – 4.2025

- Course: „CompTIA Security+ (SY0-701) Cert Prep”

- Course: „CompTIA Network+ (N10-008) Cert Prep“
- Course: „Cisco CCNA (200-301) Cert Prep“
- Course: „CompTIA A+“
- Course: „VMware vSphere 8 Certified Professional & Technical Associate“

#### LINKEDIN LEARNING | 02.2024

- Course: „Prepare for the CompTIA IT Fundamentals+ (ITF+) (FC0-U61)“

#### TECHNICAL AND VOCATIONAL ORGANIZATION (FANI HERFEI) | 02.2019

- Certification: „Computer-Benutzer“

#### BARBOD-INSTITUTE | 07.2017

- Course: “Cisco CCNA-CCENT (Exam 100-101)” - 40 Hours

## EDUCATION

#### PAYAM NOOR UNIVERSITY, SHAHIN-SHAHR BRANCH | SHAHIN-SHAHR, IRAN | 09.2010 – 06.2017

- Bachelor’s Degree in Computer Science, Specialization: Software Engineering (ZAB Validation Available)

##### Student Projects:

- Troubleshooting networks, computer systems, and the university website
- Developing a Windows script to automate antivirus updates
- Configuring and maintaining Mikrotik routers and ASUS servers
- Installing Wi-Fi hotspots to cover the campus

## SKILLS

#### IT TECHNICAL SKILLS

##### Network Administration

- Configuration and management of Mikrotik RouterOS: Wireless hotspot setup, wired and wireless networks, router and firewall configuration
- Cisco IOS administration: Switches and routers, VLAN, NAT, and DHCP

##### Virtualization

- Deployment and configuration of VMware Workstation and ESXi for server virtualization and resource optimization

##### Server & System Administration

- Windows Server: Active Directory, Group Policies, IIS Web Server, Plesk hosting panels, database backup solutions
- Linux Server (Debian, Ubuntu): Bash scripting, firewall configuration, WHM/cPanel

##### Network Security

- Implementation and management of firewalls (Mikrotik and Cisco)

##### Database Management

- MySQL/MSSQL: Database design, management, and SQL query execution

##### Monitoring & Troubleshooting

- Utilized PRTG and APIs for server monitoring and status reports

##### Data Analysis & Extraction

- Tools: Wireshark, Nmap, Puppeteer, PhantomJS for network and data analysis

##### Programming & Automation

- PHP (Laravel): Development of management scripts, API integration, WordPress caching systems
- Bash & PowerShell: Task automation and cron job scripting
- HTML/CSS/JavaScript (React): UI and web solution development

##### Content Management Systems (CMS)

- Experience with WordPress, PrestaShop, WooCommerce, DataLife Engine, Drupal, and PHPnuke

##### IT Tools

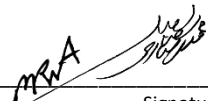

- Configuration and administration of FTP servers (FileZilla, WingFTP)

#### LANGUAGES

- Persian – Native
- English – C1
- German – B1

#### INTERESTS

- IT Security
- Cloud Computing
- Automation
- Troubleshooting
- Technical Blogging
- Team Collaboration
